

USSA Masters National Downhill Information

Rocky Mountain Masters and Ski Cooper are pleased to be hosting this year's USSA National Downhill Championship on March 10th and 11th. The weekend will include a mandatory timed training run and three race runs. The Ski Cooper downhill course has undergone some improvements over the summer, including a brand new start house (large enough to keep a number of racers out of the cold.) In general the course is very Masters friendly and is an excellent venue for both experienced speed skiers and newer racers.

Registration is being run through RMM's registration site which can be accessed at www.rmmskiracing.org or directly at www.skiracereg.com. On-line registration is open and we encourage competitors to sign up as early as possible to help with event planning.
